## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sergio D. Filice on July 15, 2010.

The application has been amended as follows:

2. Claim 27 now reads as follows:

A method of operating a vehicle brace engagable adjacent a vehicle's rear edge as material handling equipment traverses the rear edge while accessing the vehicle, the method comprising:

continuously exerting an upward biasing force on the vehicle brace by way of a first actuation system, wherein the upward biasing force is greater than the weight of the vehicle brace such that the vehicle brace is continuously biased to a raised position but that the upward biasing force does not substantially influence vertical movement of the vehicle brace when the vehicle brace is being engaged by a vehicle;

selectively causing, by way of a second actuation system, the vehicle brace to apply a reactive upward force separate from the upward biasing force and adjacent the vehicle's rear edge, wherein the reactive upward force substantially reduces downward movement of the vehicle's rear edge that would

result from the applied weight of the material handling equipment in the absence of the reactive upward force;

limiting the reactive upward force to a predetermined upper limit; and

wherein the reactive upward force reduces downward movement of the vehicle's rear edge by being substantially equal to a downward force resulting from the weight of the material handling equipment until the reactive upward force reaches the predetermined upper limit.

3. Claim 29, line 1, "The method of claim 28" now reads "The method of claim 27".
4. Claim 30, line 1, "The method of claim 28" now reads "The method of claim 27".
5. Claim 50 now reads as follows:

A method of operating a vehicle brace engagable adjacent a vehicle's rear edge as material handling equipment traverses the rear edge while accessing the vehicle, the method comprising:

biasing the vehicle brace to a raised position by continuously exerting on the brace an upward biasing force that exceeds the weight of the vehicle brace;

permitting the vehicle brace to be pushed down to a preparatory position by horizontal movement of the vehicle as the vehicle moves toward the loading dock and is in engagement with the vehicle brace;

selectively causing the vehicle brace to apply a reactive upward force adjacent the vehicle's rear edge, wherein the reactive upward force is to reduce downward movement of the vehicle's rear edge that would result from the applied

weight of the material handling equipment in the absence of the reactive upward force;

limiting the reactive upward force to a predetermined upper limit; and

wherein the reactive upward force is to reduce downward movement of the vehicle's rear edge by being substantially equal to a downward force resulting from the weight of the material handling equipment until the reactive upward force reaches the predetermined upper limit.

6. Claim 52, line 1, "The method of claim 51" now reads "The method of claim 50".
7. Claim 53, line 1, "The method of claim 51" now reads "The method of claim 50".
8. Claim 59 now reads as follows:

A method of operating a vehicle brace engagable adjacent a vehicle's rear edge as material handling equipment traverses the rear edge while accessing the vehicle, the method comprising:

biasing, by way of a first actuation system, a support member to a raised position by continuously exerting on the support member an upward biasing force;

selectively causing, by way of a variable length second actuation system, the support member to exert a reactive upward force against the vehicle's rear edge to appreciably and controllably slow the descent of the vehicle;

controlling, by way of a control system, a magnitude of the reactive upward force;

limiting the reactive upward force to a predetermined upper limit; and

wherein the reactive upward force is to reduce downward movement of the vehicle's rear edge by being substantially equal to a downward force resulting from the weight of the material handling equipment until the reactive upward force reaches the predetermined upper limit.

9. Claim 61, line 1, "The method of claim 60" now reads "The method of claim 59".
10. Claim 62, line 1, "The method of claim 60" now reads "The method of claim 59".
11. Claims 28, 31, 51, 54, 60 and 63 have been deleted.
12. The following is an examiner's statement of reasons for allowance: The allowable subject matter is found in the independent claims 27, 50 and 59 and additionally the subsequent dependent claims. Specifically the combination of method steps as set forth in the claims including but not limited to the reactive upward force reducing the downward movement of the associated vehicle rear edge because it is equal to the downward force resulting from the weight of material handling equipment until it reaches a preset upper limit, was found to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSHUA I. RUDAWITZ whose telephone number is
